THE EXPRESSION OF A LARGE NUMBER OF DEVELOPMENTALLY REGULATED GENES, THE ACTIVITY OF THIS RECEPTOR IS MEDIATED BY G PROTEINS.
-!- SUBCELLULAR LOCATION. Integral membrane protein.
-!- DEVELOPMENTAL STAGE: EXPRESSED PREDOMINANTLY DURING EARLY AGGREGATION AND AT LOW LEVELS DURING LATER STAGE.
-!- PTM: CARBOXYL-TERMINAL SER OR THR RESIDUES MAY BE PHOSPHORYLATED.
-!- SIMILARITY: BELONGS TO FAMILY 5 OF G-PROTEIN COUPLED RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    CYTOPLASMIC (POTENTIAL).

FUNCTION: COMPONENT OF THE GREEN S-BACTERIA BC-COMPLEX WHICH CONSISTS OF THE RIESKE PROTEIN AND CYTOCHROME B SUBUNIT AND WHICH, APPEARS TO LACK A CYTOCHROME C1-EQUIVALENT. THIS COMPLEX HAS A COMPARATIVELY LOW REDOX POTENTIAL. COFFACTOR: TWO HEME GROUPS (B562 AND B566) WHICH ARE NOT COVALENTLY BOUND TO THE PROTEIN.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
